IIIT Delhi and IHFC, the Technology Innovation Hub of IIT Delhi, have collaborated to establish a Co-Innovation Center (CIC) at the CiPD. Get details here

Indraprastha Institute of Information Technology Delhi (IIIT-Delhi) has partnered with the I-Hub Foundation for Cobotics (IHFC), the Technology Innovation Hub of IIT Delhi, to establish a Co-Innovation Center (CIC) at the Centre for Intelligent Product Development (CiPD) on the IIIT-Delhi campus. This strategic collaboration aims to foster innovation, advance technology, and nurture entrepreneurial talent among India's youth.

Co-Innovation Centres

The newly established Co-Innovation Center is a key step in realizing a broader vision to cultivate innovation and technological excellence among India's youth. Designed to nurture aspiring entrepreneurs and innovators, the centre provides a dynamic platform that encourages original thinking,

impactful product development, and deep-tech exploration. With a strong emphasis on indigenous research, the initiative aligns with national missions such as Viksit Bharat and Aatmanirbhar Bharat. By fostering a culture of creativity and applied research, CiPD and IHFC aim to empower young minds to develop globally competitive solutions and translate breakthrough ideas into real-world applications.

On this occasion, Prof. Ranjan Bose, Director, IIIT-Delhi said, "The establishment of CIC at CiPD further strengthens our ties with IHFC and is a win-win for both IHFC and IIIT Delhi. This engagement will co-exist with the Medical Cobotics Center (MCC) that iHub-Anubhuti, the Technology Innovation Hub of IIIT Delhi had launched with IHFC. I wish great success to this initiative and look forward to innovative products coming out of this fruitful partnership."
